Now you put the squares on the cap, 8 pieces around the hat. Then you put another row of 8 squares around the hat.

Knit 16 squares but start with 21 stitches. Put them in two rows on to the hat.

Knit 16 squares starting with 19 stitches and put them on the hat.

Knit 16 squares starting with 17 stitches and put them on the hat.

At last make 14 squares starting with 17 stitches. Put them in two rows with 7 pieces in each row and now you are at the top of the hat. The two last rows are the squares not fitted in between the squares from the last row as in previous rows, because the top is narrower.

If you want you can gently steam the hat and pull in the squares to make them a bit pointier.

Decorate the tree. The one in the picture has small balls in crochet. Start with 4 stitches in the round, increase to 8, crochet one row and decrease on the next row to 4. Use the end to put it in the tree. The yarn at the start can be used to fill the small ball.

Put a star in the top and go out and make people happy!
